-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a container handle with a clip, classified in class 220, subclass 756.
 - II. Claims 10-15, drawn to a method of making the product, classified in class 264, subclass 500.
2. Inventions of Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product could be formed by other molding processes such as vacuum forming.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. During a telephone conversation with Mr. Brian Carpenter on May 4, 2005 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-9. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 11-15 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 and 6-8 rejected under 35 U.S.C. 102(b) as being anticipated by Barber (2,626,174).

7. Regarding claims 1-3, Barber discloses a drinking container handle (12, 13, Figure 9) with a clip capable of holding an article (14) and the clip is connected to the underside of the handle and is biased against the container (column 3, lines 13-17).

8. Regarding claims 6-9, unitary is defined in the American Heritage Dictionary as having the nature of a unit. Barber discloses the clip connected to the drinking container handle that is mounted on the drinking container body as one unit. The drinking container has a rim shown above the handle (12) in Figure 9 connected to the body and the handle. The clip is connected to the underside of the handle.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1, 4, 5 and 9 rejected under 35 U.S.C. 103(a) as being unpatentable over Barber in view of Giraud (2003/0029876 A1, February 13, 2003).

11. Barber discloses the drinking container of claim 1 as discussed in paragraph 7 above but does not teach the use of container body with a container liner. Giraud discloses an insulated drinking container with an inner liner (12, Figure 1, paragraph 0019) with an integral rim, a container body (11) connected to the rim (at 15) and a base (14). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have incorporated the use of a drinking container with a an inner liner with an integral rim, a container body connected to the rim and a base as disclosed by Giraud with the handle and clip of the drinking container disclosed by Barber to provide an insulated drinking container to retard the rate of temperature change of the contents of the drinking container.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Harry A. Grosso whose telephone number is 571-272-4539. The examiner can normally be reached on Monday through Thursday from 7am to 4 pm.
